

B.Tech - Semantic HTML Multimedia Webpage

1. WEBSITE DETAILS

Title of the Website:

Form

Purpose of the Website:

The purpose of this website is to design and implement an HTML-based survey form that demonstrates the creation of structured forms, the use of multimedia embedding, client-side validation, and navigation between pages using HTML and CSS.

Target Users:

- Students
- Beginners in Web Development
- Educational Institutions

Tools Used:

- HTML5
- CSS3
- Text Editor (VS Code)
- Web Browser (Brave)

Key Features:

- Semantic HTML structure
- Internal CSS styling for layout and hover effects
- Structured survey form using HTML
- Embedded PDF using the '<embed>' tag
- Accessible content layout
- Client-side validation using 'required' attributes
- Navigation to the confirmation page after submission

B.Tech - Semantic HTML Multimedia Webpage

2. TAG DEFINITIONS USED IN THE WEBPAGE

2.1 Basic Structure Tags

Tag	Definition
<html>	It represents the root of an HTML document.
<head>	It is a container for metadata for the <body> tag
<title>	It shows the title of the website in the browser
<body>	It contains the content of the webpage
<style>	It is used for CSS styling for the content in <body>
<div>	It is a wrapper for the content

2.2 Semantic Tags

Tag	Definition
<form>	It is used to create an HTML form for user input.
<label>	It shows a description of the input field
<input>	It is used to accept user input
<textarea>	It allows multiline input
<button>	It submits the form
<select>	It allows users to select from dropdown

B.Tech - Semantic HTML Multimedia Webpage

2.3 Multimedia Tags

Tag	Definition
<embed>	It is used to embed pdf in the website
	It is used to embed images in the website
<a>	It is used to embed links in the website

4. DECLARATION

I hereby declare that this practical work entitled
“Design and Development of a Semantic and Multimedia Webpage Using HTML5”
is my original work carried out by me. This work has not been copied from any source and has not been submitted earlier for any examination.

Name of Student: Samarth Sunil Navale

Roll Number: 150096725148

Signature of Student: Samarth

Date: 16-01-2026

5. FUTURE SCOPE

The current website is developed using only HTML5. The future enhancements that can be implemented are:

- Applying CSS for improved visual design and layout
- Adding interactivity using JavaScript
- Making the website fully responsive for all devices
- Hosting the website on a live server
- Adding backend and database integrations
- Saving drafts of user inputs for better accessibility
- Enhancing accessibility using ARIA attributes
